PROFESSIONAL SUMARY

Full Stack Engineer with 2+ years of experience in designing and developing scalable web applications, microservices, and APIs. Proficient in JavaScript, TypeScript, Go, and C#, with a strong foundation in data structures, algorithms, and software design principles. Passionate about solving complex problems and learning new technologies to deliver high-quality software solutions.

EXPERIENCE

BrBit Sistemas - Full Stack Engineer

February 2024 - Present

- Designed and developed a robust microservice (.NET, RabbitMQ) for seamless integration with Banco do Brasil's batch payment API, automating and optimizing financial transaction processing.
- Designed and implemented a high-performance data aggregation service (Go, Gin, S3) consolidating 50+ distributed PostgreSQL databases into static datasets, reducing data processing time by 80%.
- Built a dynamic dashboard (Next.js, Chart.js, React Query) that fetches data based on user tenancy and role, ensuring personalized and secure access to relevant information.
- Implemented CI/CD pipelines, deployed new services to production, and provided ongoing support by debugging and ensuring optimal performance for more than 10 services.

BrBit Sistemas - Full Stack Developer

January 2023 - February 2024

- Collaborated and maintained a multi-tenancy admin web application (.NET, React, Next.js) for more than 60 tenants.
- Designed and deployed a dynamic report generation platform (Node, PostgreSQL, Puppeteer, S3, SES) that automated 95% of manual processes, serving 200+ monthly users with PDF/Excel outputs.

SKILLS

- General Programming: Javascript, Typescript, Go, C#, Java
- Web Development: JavaScript, HTML, CSS, React, Next.js, Vite, Svelte, MUI, Shadcn/ui, Tailwind CSS, Node.js, Bun, Prisma, C#, .NET, Entity Framework, Express, WebSockets, RESTful APIs, GraphQL, Puppeteer, SEO
- Databases: PostgreSQL, MySQL, MongoDB, Redis
