## Experience

**Full Stack Engineer**            **BrBit Sistemas**            Feb 2024 - Present

- Designed and developed a robust microservice (.NET, RabbitMQ) for seamless integration with Banco do Brasil's batch payment API, automating and optimizing financial transaction processing.
- Designed and implemented a high-performance data aggregation service (Go, Gin, S3) consolidating 50+ distributed PostgreSQL databases into static datasets, reducing data processing time by 80%.
- Built a dynamic dashboard (Next.js, Chart.js, React Query) that fetches data based on user tenancy and role, ensuring personalized and secure access to relevant information.
- Implemented CI/CD pipelines, deployed new services to production, and provided ongoing support by debugging and ensuring optimal performance for more than 10 services.

**Full Stack Developer**            **BrBit Sistemas**            Jan 2023 - Feb 2024

- Collaborated and maintained a multi-tenancy admin web application (.NET, React, Next.js) for more than 60 tenants.
- Designed and deployed a dynamic report generation platform (Node, PostgreSQL, Puppeteer, S3, SES) that automated 95% of manual processes, serving 200+ monthly users with PDF/Excel outputs.

## Education

**Bachelor of Information Systems**            **UNIFEBE**            Feb 2023 - Dec 2026

**Technical in Information Technology**            **IFC Campus Brusque**            Feb 2020 - Dec 2022

## Projects

**Blog** (View, Github) *Typescript, Next.js, MDX, Tailwind CSS, Redis, GitHub REST API*

Engineered full-stack CMS using Next.js 14 App Router with MDX content pipeline, enabling code snippet embedding and Admin access for managing posts.

**Cliparoo** (View, Github) *Tauri, Svelte, Svelte Kit, Rust, Tailwind CSS, Daisy UI*

Developed a privacy-focused desktop cross-platform clipboard manager that enhances productivity through advanced clipboard management. Features include smart search across 2000+ clipboard history items, customizable themes, clean dashboard. Built with SvelteKit's file-based routing and Daisy UI components for better UI experiences while maintaining 100% local data storage by default.

## Languages

- Portuguese: Native
- English: Professional

# Skills

- General Programming: Javascript, Typescript, Go, C#, Java

- Web Development: JavaScript, HTML, CSS, React, Next.js, Vite, Svelte, MUI, Shadcn/ui, Tailwind CSS, Node.js, Bun, Prisma, C#, .NET, Entity Framework, Express, WebSockets, RESTful APIs, GraphQL, Puppeteer, SEO

- Databases: PostgreSQL, MySQL, MongoDB, Redis

- Cloud & DevOps: AWS (S3, SES, SQS), Firebase, Vercel, Docker, CI/CD Pipelines

- Tools: Git, GitHub, GitLab, Postman, Insomnia, VS Code, Docker, Figma

- Soft Skills: Problem-Solving, Teamwork, Communication, Time Management
